

UNIMET - UM02E

Two Input - at a time two air gauges or two probe can be connected

- Unimet UM02E dual channel output - electronic readout offers exceptional performance and is intuitive and easy to use.
- This autonomous electronic readout instrument is designed for measuring lengths such as external, internal, step, height, or depth dimensions, as well as distances.
- Its concept also enables measurements of form and orientation tolerances such as straightness etc.
- In-built air transducer is provided for the air-electronic unit and probe input is provided for the electronic unit
- In-built Air saver facility
- It provides the facility of absolute & comparative types of readings
- Tri-color display; Red, Green, Yellow (RGY) based on the tolerance
- RS 232 data output
- Least count 1 μm ./0.5 μm .
- 10 measuring programs can be stored in the internal memory
- Relay outputs can be provided on a need basis at extra cost
