

## UNIMET - UM04E

### **Four Input i.e. at a time four air gauges or four probes can be connected**

- Unimet UM04E four-channel output - electronic readout offers exceptional performance and is intuitive and easy to use.
- This autonomous electronic readout instrument is designed for measuring lengths such as external, internal, step, height, or depth dimensions, as well as distances.
- Its concept also enables measurements of form and orientation tolerances such as straightness or taper errors.
- In-built air transducer is provided for the air-electronic unit and probe input is provided for the electronic unit
- In-built Air saver facility
- It provides the facility of absolute & comparative types of readings
- Tri-color display; Red, Green, Yellow (RGY) based on the tolerance
- RS 232 data output
- Least count 1  $\mu\text{m}$ ./0.5 $\mu\text{m}$ .
- 10 measuring programs can be stored in the internal memory
